

Assembly instructions

for kawapro, kawaQ, kawabasic, kawaform, owo new, owo ladybird, owo bee

Dear Customers,
Thank you for your decision to buy a timkid product.

You have been given the completely assembled nappy wallchanger.

Further parts are:

One or two acrylic shelf/ shelves (except **kawaQ**)
A bag filled with screws and assembly tools
One sticker (not included in **owo new, owo ladybird** and **owo bee**)

Carrying out the assembly:

Please notice the correct side mentioned on the steel wall hanger and mark the holes.

Drill holes into your wall.

As there are many different walls (timber, concrete, clay etc.), it is important that you use the correct dowel for your wall.

Ask a skilled worker or a DIY market about the correct fitting material.

Put in the acrylic shelf/shelves removing the protective foil first. Please note to put a metal piece left and right in front of each shelf to secure it.

Please observe!

- **Your baby may never be allowed to lie on the changing table unobserved!**
- **Avoid direct heat near the changing table!**
- **Recommend for children up to 15 kg (Maximum weight 50 kg)**
- **Do not use changing mats thicker than 20mm**

Cleaning instructions:

Wood and laminate: wipe damp or use standard cleanser.

Changing mat: wipe damp or use standard disinfectant.
